Seven Leverage Points:

If you want to achieve system-level results...

1. Set specific system-level aims and oversee their achievement from the top
2. Build an executable strategy to achieve the aims, and oversee the execution from the top
3. Channel attention to system-level aims and measures
4. Get patients and families on your team!
5. Engage the CFO in achieving the aims
6. Engage doctors in achieving the aims
7. Build the necessary improvement capability

Introducing the NICLG

- The National Information Clinical Leadership Group is made up of a variety of professional bodies and colleges providing leadership and support for clinicians in NZ.
- NICLG's role provides clinical leadership input to the National Health IT Plan.
- NICLG engages on a wide range of clinical process and information solutions covering:
 - clinical decision support
 - safe medications management
 - safe sharing of information
 - transfer of care.

ROLE OF NICLG AND ALIGNMENT WITH NHITB

- Clinicians learn from other clinicians and their experiences
- NICLG needs to:
 - demonstrate clinical governance and provide leadership
 - to be aware and influence design of national projects
 - contribute to a prioritisation framework
 - know how the jigsaw fits together, rather than the detail

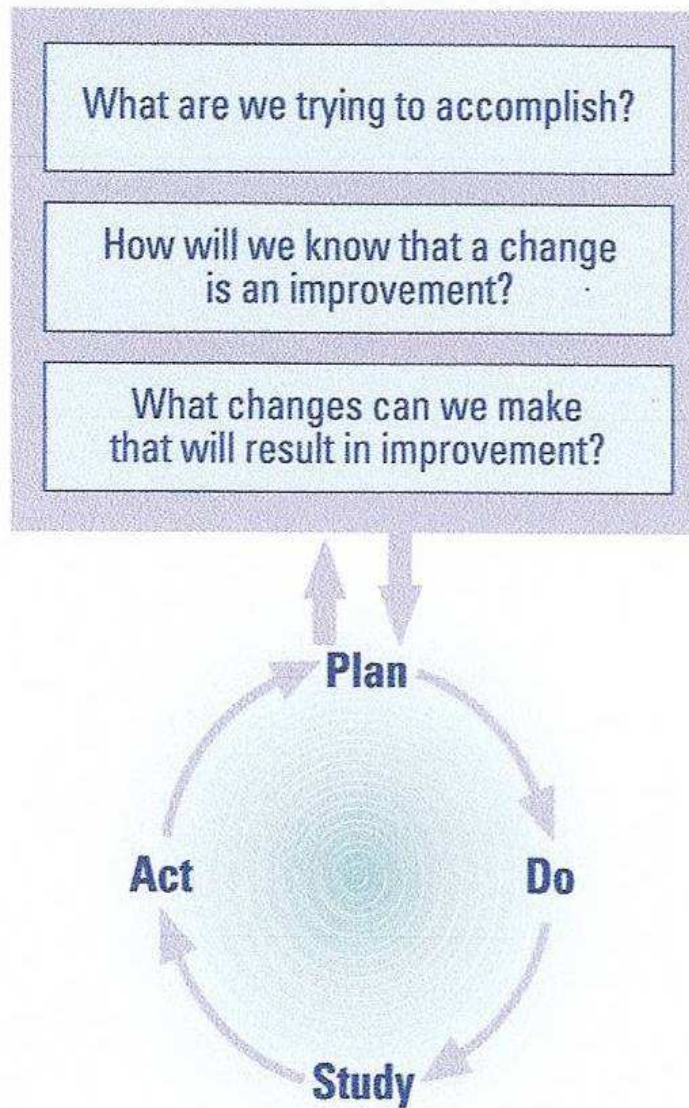

ROLE OF NICLG AND ALIGNMENT WITH NHITB

- Priorities - NICLG needs
 - Wide leverage but also to drive 1 or 2 areas through to success
 - Greater awareness of the priority projects
- Change management has to be driven from the bottom up
 - Biggest hurdle
 - NICLG can help support the national projects
 - Clinical leadership will support sustainability of changed behaviour/activity
- Have we communicated our approach and do we know when we are successful?

ROLE OF NICLG AND ALIGNMENT WITH NHITB

- Will people cooperate with what is proposed?
 - Must be easier for clinicians tomorrow
 - Consumers can be agents for change
- What is the pace and cost of implementation ?
 - Share the learnings
 - Relationships with other groups – understand linkages and their priorities?
 - NHITB is promoting NICLG to other sector groups to prevent duplication
 - Communication plan with other projects
